Percentage: 79.6

SKILLS

Programming Languages and Frameworks: Python, HTML, CSS, SQL, JavaScript,React.js
Soft Skills: Fast Learner, Communication & Collaboration, Adaptability, Leadership, Detail Oriented
Data Visualization Tools: Power BI

EXPERIENCE

Internship - Valethi
- As a Customer Support Intern at Valethi, I efficiently responded to client emails and inquiries, provided solutions and remedies for customer issues, and managed product replacements and returns. I successfully handled customer support for Weber, an international company specializing in grills, contributing to maintaining strong customer relationships and enhancing the overall client experience.

PROJECTS

Credit Score Dashboard
This project aimed to create an interactive and insightful credit score dashboard using Power BI. The dashboard provides with a comprehensive view of the credit scores, trends, and factors affecting the credit score. By leveraging Power BI's data visualization capabilities, the project ensures that we can easily understand it.

Recipe Finder
Created a recipe web application using React, Tailwind CSS, and API integration. Users can search and discover a wide array of recipes tailored to different dietary preferences. The app provides detailed ingredient lists and allows users to save their favorite recipes directly to their browser's local storage for easy access.

Personal Portfolio
In this project a website is developed to showcase my professional skills, projects and achievements. This platform serves as an interactive resume, providing visitors with a comprehensive view of my background, experience, and expertise. Through this project I gained my skills in web development, content creation, highlighting my ability to effectively present information and engage with potential collaborators.

LANGUAGES SPOKEN include English, Hindi, Marathi.
